tea, coffee or soft drink

A Geopark is an area recognized by UNESCO, as North America's first Geopark, Stonehammer is about geology but it is also about the people, society and culture. You can hike, kayak, rock climb, cruise and zip, eat and tour. The Stonehammer landscape has been created by the collision of continents, the closing and opening of oceans, volcanoes, earthquakes, ice ages and climate change. The rocks of our Geopark have been witness to the evolution of life, from the first discovery of Precambrian stromatolite fossils, to the 'Cambrian Explosion' of life, to the evolution of vertebrates and the emergence of life on land. The Geopark includes geological stories from late Precambrian time a billion years ago to the most recent Ice Age, and almost everything in between.
